uncrustify 配置

1. 安装

```
1 git clone https://github.com/uncrustify/uncrustify.git
2 cd uncrustify/
3 mkdir build && cd build
4 cmake ...
5 sudo make install
6 uncrustify #检查安装是否ok
```

2. code安装插件

3. 配置code

```
"editor.inlineSuggest.enabled": true,
"workbench.sideBar.location": "right",
"explorer.confirmDelete": false,
"diffEditor.ignoreTrimWhitespace": false,
"MATLAB.installPath": "matlab.installPath = '/home/lkx/opt/matlab'",
"uncrustify.configPath.linux": "ament_code_style.cfg",
"[cpp]": {
"editor.defaultFormatter": "zachflower.uncrustify"
},
"git.openRepositoryInParentFolders": "never"
```

4. 配置cfg

下载,放在工作空间根目录下

https://git.ddt.dev:9281/rbt/alg/sim-webots/-/commit/3d20c7dbb6ed542426beebfea6e494741ac90f50

欢迎补充修改~
